

Creative Confidence

CREATE a sketch in the box below. Think of a scale from 1-10 where 10 means you're a creative genius and one means your seeds of creativity have a lot of potential.

Write that number here: _____

Reflect on that scale as you draw yourself as a plant that is either a seed, emerging sprout, or a plant in full bloom.

PRESENT your plant sketch and creative confidence score to someone else. What nourishes your creative growth? Tell a story about a creative experience that you had.

RESPOND to someone else's story, plant sketch, and creative confidence score. How are your creative experience stories similar or different? Describe how conversations can build creative confidence.

CONNECT how creative confidence influences your education and success. Discuss why people need to be creative thinkers who have creative confidence.
