

Making a Photo Transfer

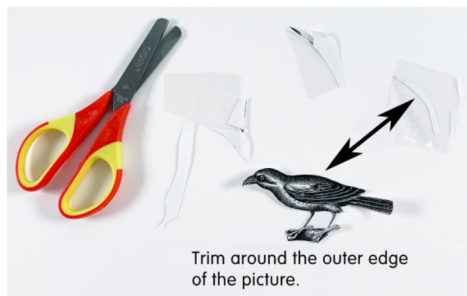

Steps

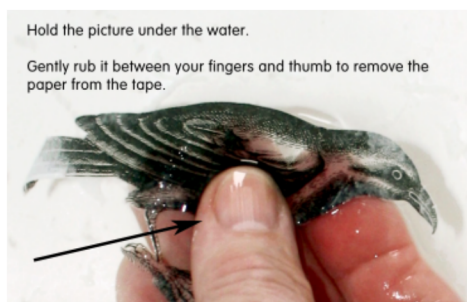

Step One

1. Cut out a black and white photocopied picture.
2. Leave a small border of white paper around the image.
3. Tape it to a piece of clear packing tape.

Step Two

1. Trim around the outer edge of the picture to remove the excess paper and tape.

Step Three

1. Place the picture into a basin of water. Let it sit for a few seconds.
2. Hold the picture under the water.
3. Rub the picture between your fingers and thumb to remove the white paper from the tape.

Step Four

1. Glue the picture that has been transferred from the paper to the tape onto a prepared surface such as a painted box.
